

Sexual Misconduct: A Blueprint for Risk Management

Sexual misconduct (regardless of the type) can open the door for criminal and civil liability and subject the entire school community to devastating ripple effects. In this litigious society, schools can take decisive, deliberate steps to protect and defend against negative consequences and become equipped to demonstrate tangible, measurable, compliance efforts.

As a PSRI member, you now have access to Wylie3's *"Blueprint for Sexual Misconduct Risk Management"*. This includes tools, resources, best practices, and staff development solutions to manage risks associated with sexual misconduct both on/off campus. Designed by Wylie3 Solutions, a non-profit training and consulting foundation specializing in sexual misconduct prevention, this best-in-class blueprint can be incorporated as one component of an overall comprehensive approach.

Wylie3 Solutions serves and supports public schools and works with risk management agencies, insurance member groups, and education leaders in these efforts. Grant monies are available to subsidize staff development, a critical component of a comprehensive approach.

Please visit the *Sexual Misconduct Risk Management Portal* <http://wylie3solutions.org/risk/> as well as the Wylie3 website <http://wylie3solutions.org/> to learn more about how to equip your school community to protect and defend against risks associated with sexual misconduct.

All the best,
Wendy/Founder & President
